

The new I44 Impactor continues to bring high quality and high production capacity to McCloskey® mobile impactor applications.

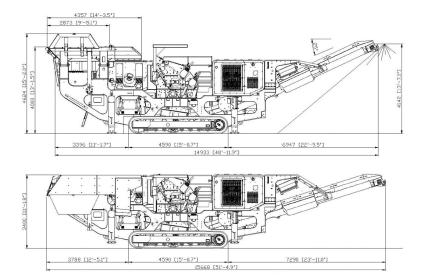

- 268kW (360Hp) engine
- Integrated hydraulic folding hopper
- I-beam plate fabricated chassis construction
- Open chassis design for ease of maintenance
- √ Fast setup time
- Integrated hydraulic folding stockpiling conveyors
- 365SiteConnex Telematics enabled.

Efficiency is boosted with the I44 crusher design, particularly in the material flow path. Each sectional component is wider than the last to allow an unrestricted flow without funneling or narrowing, eliminating material bridging. The direct drive crusher rotor is also a new feature on the I44, bringing more power, along with lower fuel costs.

The redesigned open chassis allows for better access, and a magnet contributes to easier operation of the crusher. The I44's versatility and upgraded design makes it ideal for some of the toughest applications worldwide, including aggregates, asphalt recycling, concrete recycling, mining, construction and demolition.
